

State Company For Battery Industries Produce 158 Batteries in 2010

While discussing the financial statements of the State-Company for Battery Industries, the Financial Control Council, in its 28th session, has found out that the company's key production indicator for 2010 was the manufacturing of 158 battery units, each per 2 days. Some 2138 workers engaged in the process, i.e. 13 workers per a battery.

Each battery, based on the total annual realized costs of 18.5 Billion IQD including salaries and expenses, costs 117 million IQD, whereas the battery price at local market is 70 thousand IQD.
